UCHE OSUJI

osujiun@rose-hulman.edu | linkedin.com/in/uchechiosuji

Education

Bachelor of Science, Computer Engineering. Minors, Geography and Spanish May 2027
Rose-Hulman Institute of Technology, *Terre Haute, IN* GPA: 3.25
Honors: *Dean's List: Spring 2024, Winter 2026, Spring 2026*
Related Courses: Computer Architecture I & II, Data Structures and Algorithms, Embedded Systems, Electronic Modeling, Communication Networks, High-Speed Digital Design, Signals & Systems

Work Experience

CRWN | Co-Founder and Chief Technology Officer | Remote September 2025 – Present
- Architected and developed a full-stack mobile MVP using **React Native**, **Expo**, **JavaScript**, and **Supabase**, delivering hair profiles, social posts, community threads, and push notifications
- Prioritized user-generated content and provider profiles based on user and provider feedback; secured $18,150 in non-dilutive funding through startup competitions and accelerators
- Led launch and growth efforts, reaching 100+ users in the first 48 hours and generating 300K+ organic social media views over eight months with zero ad spend

Keurig Dr Pepper | Software Engineering Intern, Embedded Software | Burlington, MA June 2026 – August 2026
- Developed an end-to-end thermal cutoff fault detection and alerting feature in **C/C++** for commercial brewing systems, exposing 2 previously undisplayed fault conditions and providing recovery guidance
- Implemented and validated fault communication across 3 software layers, using Tera Term over UART and Jenkins to test board-level fault detection through user-facing HMI notifications
- Investigated, tracked, and resolved 2 firmware and HMI defects using **Jira** and **C/C++**, eliminating low-water notification and brew counter errors that occurred on every brew

Keurig Dr Pepper | Software Engineering Intern, Brew Engine | Benton Harbor, MI June 2025 – August 2025
- Built and deployed a **Python** GUI cycle-generation tool that automated testing for 13+ beverage-cycle variants, eliminating up to 3-week waits for software team support on cycle changes
- Executed 48+ thermal lab tests on heating elements, analyzed performance data, and delivered findings that informed design changes for steam quality and beverage consistency
- Partnered with software, electrical, and test engineers to reproduce system failures, isolate root causes, and validate fixes across commercial brewing-system hardware and software

Hair Hub | Product Manager | Remote June 2024 – June 2025
- Developed a DIY hair care app for Black women, translating user needs into styling inspiration, tutorials, product recommendations, and planning tools to help reduce hair care costs
- Led launch and growth efforts through stakeholder partnerships, pitch competitions, and a 15-person ambassador team, reaching 12K+ downloads within nine months and 1M+ social media views

Projects

Vision Guided Line Following Robot | Embedded Systems Project, Controls Engineer March 2026 – May 2026
- Implemented a **PID** controller on an **ESP32** in **C/C++**, reading HuskyLens line data over **I2C** and driving the servo and ESC with 50 Hz **PWM**
- Built a **BLE** interface to tune PID gains live and stream steering and throttle telemetry

Pipelined Processor | Computer Architecture Project, Datapath Designer February 2026
- Built a 5-stage pipelined **RISC-V** processor in **Verilog** supporting all instruction formats

Embedded MP3 Player | Intro to Embedded Systems Project, Firmware Lead February 2025
- Wrote **embedded C** firmware for an **MSP432**, using timers and interrupts to control a 6-song playlist
- Generated **PWM** audio through an **NPN** transistor driver, verifying notes within 0.1% on an **oscilloscope**

Technical Skills

Languages: C, C++, Python, Java, JavaScript, Verilog, MATLAB
Software & Tools: Git, Jenkins, Jira, Tera Term, ModelSim, PSpice, Figma, LabVIEW, DesignSpark, CST Studio, Ansys
Hardware & Electronics: Arduino, Circuit Design, PCB Design, Breadboarding, Soldering, Oscilloscope
Protocols: UART, I2C, BLE

Leadership and Professional Development

Adobe Student Ambassador September 2026 – Present
Chi Omega Fraternity | Recruitment & COB Chair December 2024 – Present
Women's Varsity Cheer October 2024 – Present
National Society of Black Engineers | Membership Chair May 2024 – May 2025
